Profile

Computer Science graduate (B.Sc., Tel-Hai College 2026), experienced in academic and industry-oriented projects with Google, NVIDIA, and Check Point through Excellent Team bootcamp. Skilled in Python, C++, and JavaScript with a strong foundation in algorithms, OOP, and teamwork. Completed full military service, bringing discipline and resilience. Seeking a junior software or full-stack developer position.

Technical Skills

Languages: Python, C, C++, C#, Java

Web: HTML, CSS, JavaScript, React

Tools: Git, Node.js, Flask, Linux, Docker

Concepts: OOP, Design Patterns, Data Structures, Algorithms

Databases: MySQL, SQLite

Projects

[SettleIt](#) – Group Decision-Making AI Agent (Python, FastAPI) | [Live](#)

Built a real-time web app where a group chats while an AI agent reads the room, proposes voteable suggestion cards, and locks a shared decision into actionable missions. Engineered the async FastAPI backend with WebSockets, SQLAlchemy/PostgreSQL, and a swappable Gemini/Groq LLM provider with web-search grounding.

[Secured Chat](#) – Semantic DLP for Real-Time Messaging

Designed a real-time message-security pipeline that detects data leakage using vector embeddings and cosine similarity instead of costly per-message LLM calls. Layered URL threat analysis, a lightweight prefilter, and precomputed semantic matching to block sensitive content before delivery.

[Daniel Words](#) – Voice-First Bilingual Word Game (Python, FastAPI) | [Live](#)

Built a voice-first word-practice app for kids that records speech in the browser, streams it to a Python API, and scores it against a Whisper model for instant English/Hebrew feedback. Implemented fuzzy cross-language matching and deployed to production across Vercel, Railway, and Supabase.

[Google Project](#) – Autocomplete Search Engine (Python)

Built a trigram-based fuzzy autocomplete search engine with indexing, tokenization, and efficient prefix matching. Implemented scoring and ranking logic and delivered a full command-line interface.

Experience

Technical Support – Bezeq (2020–2022)

-Provided network and communication technical assistance, troubleshooting issues in real-time.

-Handled English-speaking phone calls, serving as the main contact for international clients.

Military Service

Israel Defense Forces – Completed full mandatory service.

Languages

Hebrew – Native | English – Professional
